Mr. E. J. Fjeldsted, Manager  
Weber Basin Water Conservancy District  
RFD #2, Box 223  
Layton, Utah

Dear Mr. Fjeldsted:

The contract between the Weber Basin Water Conservancy District and Willard L. Dillree for the sale of the use of two acre-feet of Weber Basin Project water on an exchange basis, for irrigation, municipal, and miscellaneous purposes, has been approved by the United States. Two signatory copies are enclosed for your use and for Mr. Dillree.

The point of use is on the Weber River in the vicinity of Echo, Utah. It is our opinion an exchange may be made by means of releasing an equivalent amount of water from Wanship Dam to users below Echo. Water for this contract is available under Unit Notice No. 2 starting in 1963. Delivery of such water shall be as directed by the State Engineer or his representative at Wanship Dam.

We would like to suggest that in future contracts, Article 3 of the form used in this contract be revised to provide for annual operation and maintenance payments for the duration of the contract, rather than "--- until payment in full --- of the construction obligation ----."

Sincerely yours,

*Clinton B. Woods*
